## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 12\_Q1

Attempt : 1

Total Mark : 10

Marks Obtained : 10

#### **Section 1 : Coding**

##### **1. Problem Statement**

Sabrina is working on a project that involves analyzing a set of numbers. In her exploration, she encounters scenarios where extracting even numbers and finding their sum is essential.

Create a program that calculates the sum of even numbers from a given array of integers using a lambda expression.

##### ***Input Format***

The first line of input consists of an integer N, representing the size of the array.

The second line consists of N space-separated integers, representing the elements of the array.

##### ***Output Format***

The output prints the sum of the even integers from the array.

Refer to the sample output for formatting specifications.

### **Sample Test Case**

Input: 3

29 37 45

Output: 0

### **Answer**

```
// You are using Java
import java.util.*;
import java.util.stream.*;
class Main{
    public static void main(String[]args){
        Scanner sc= new Scanner(System.in);

        int n=sc.nextInt();
        int[] arr=new int[n];

        for(int i=0;i<n;i++){
            arr[i]=sc.nextInt();
        }
        int sum= Arrays.stream(arr)
            .filter(x->x%2==0)
            .sum();
        System.out.println(sum);
    }
}
```

**Status : Correct**

**Marks : 10/10**
